

I am opposed to weakening the "Do not call" law in NJ. Before I activated the "Do not call" for my household, I was continuously called and interrupted by UNWANTED telemarketing calls during the day. There were frequent hang ups due to computer generated calls which were unnerving and suspicious. The phone calls during the evening hours were overwhelming and annoying. Since activating "Do Not Call", I do not receive any of those calls and I do not miss them in the least. I did not want ANY of the products that were being sold or marketed ever. They were a time waster, an annoyance and the frequent hang ups were very unnerving. DO NOT WEAKEN THE NJ LAW!
